System Cleaners

Features and Benefits

Axi-Therm System Cleaners provide effective means to restoring and protecting the critical components within modern hydronic systems. Axi-Therm System Cleaners are suitable for all kinds of hydronic heating and cooling systems and provide energy savings by restoring heat transfer and water circulation to near original levels.

CLEAN 3 - NEW System Cleaner

Available in 500mL, 2L, 20L

Dosage: 0.5% system volume

Application: Circulate throughout entire closed loop system PRIOR to initial commissioning

Result: Treatment solution will help dissolve oil residue and metal oxides found in new installations

CLEAN 5 - OLD System Cleaner

Available in 500mL, 2L, 20L

Dosage: 0.5% system volume

Application: Circulate throughout an established (old) closed loop system for up to 30 days

Result: Treatment solution will passively dissolve sludge and metal oxides found in older/established systems

CLEAN 10 - TOTAL System Cleaner

Available in 5L, 20L

Dosage: 5-10% system volume

Application: Circulate throughout a troubled established closed loop system for up to 30 days

Result: Treatment solution will dissolve sludge, metal oxide & limescale found in poor performing systems

CLEAN BOILER - Boiler Water-Side Cleaner

Available in 1L

Dosage: 10-20% boiler water volume

Application: Powerflush through an isolated heat exchanger for up to 8 hours

Result: Treatment solution will dissolve metal oxide and limescale incrustations and reduce noise in heat exchanger

PROTECT 1 - Scale & Corrosion Inhibitor

Available in 500mL, 2L, 20L

Dosage: 0.5% system volume

Application: Circulate Protect 1 throughout system; confirm dosage with P1-Test

Result: Provides energy savings by protecting against corrosion and lime scale. Safe for all metals.

System Inhibitor

Fire Side Cleaners

Axi-Therm unique combustion-side chemical treatment quickly helps clean and restore heat transfer area of condensing heat exchangers back to near new levels.

CLEAN F-STEEL
Combustion cleaner for
STAINLESS STEEL heat
exchangers
Available in 1L

Before

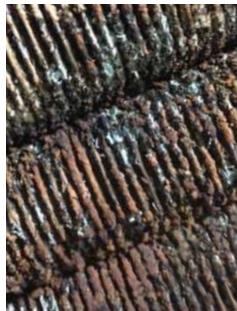

After

CLEAN F9-A
General combustion
cleaner
Available in 1L

Before

After

CLEAN F9-AL
Two-step
combustion cleaner
for ALUMINUM heat
exchangers
Available in 1L
