

AXI-THERM

CLEAN F STEEL

BOILER “COMBUSTION SIDE” CLEANER

Removes even the most stubborn combustion residue from stainless steel and copper heat exchangers.

FEATURES and BENEFITS

- *Provides energy savings by removing combustion residue from the fire side surface of heat exchangers made from stainless steel in condensing boilers*
- *Restores heat transfer to the original levels*
- *Each bottle comes with an extended spray nozzle to help with accessing the hard to reach areas in the heat exchanger*
- *Security bottle seal*
- *No pouring or mixing needed*
- *Available in 1 L (33 oz.) bottles*

DIRECTIONS:

Spray AXI-THERM CLEAN F STEEL directly onto the cold surface to be cleaned until the deposits to be removed are completely wet. Do not dilute prior to application. Let the product react for 3 - 5 minutes before brushing and rinsing. In case of persistent deposits, repeat the cleaning procedure. Firing the boiler afterwards will help to further clean the heat exchanger. Thoroughly rinse the whole surface with water. Do not mix with other chemicals. Do not use in potable water systems. Do not ingest. Do not dispose of waste through the environment. Keep out of reach of children.
